Legislation and permit allocation

The allocation of rights to prospect, explore or mine minerals that are owned by the Crown is carried out by the issuing of permits under the Crown Minerals Act 1991. The policy and procedures followed for the allocation of the mineral resources are determined in the Minerals Programmes and requirements to be met defined in the Regulations.

Issues to do with the environment are dealt with under the Resource Management Act 1991. Local government authorities manage resource consents required under the Resource Management Act 1991. This process is separate from obtaining a permit for mineral rights under the Crown Minerals Act 1991. The purpose of the Resource Management Act 1991 is to promote sustainable management of natural and physical resources, including use and development.

Neither a permit under the Crown Minerals Act 1991 or a consent under the Resource Management Act 1991 give a right of access to land. Land access is determined by direct negotiation with the landowner.

Prior to commencing any work on the ground an applicant must ascertain and obtain what is required in terms of:

a minerals permit from Crown Minerals under the Crown Minerals Act 1991

an access arrangement from the landowner and occupier

Resource Consent(s) from either the District Council or the Regional Council under the Resource Management Act 1991.

Crown Minerals Act 1991

The [Crown Minerals Act 1991](#) sets the broad legislative policy for prospecting, exploration and mining of Crown owned minerals in New Zealand. These include all naturally occurring gold and silver and substantial amounts of coal and other metallic and non-metallic minerals and aggregates.

Minerals Programmes

The Crown Minerals Act 1991 requires the Minister of Energy to prepare minerals programmes. The [Minerals Programme for Minerals \(Excluding Petroleum\) \(2008\)\[2.4MB PDF\]](#) policies for the allocation of permits and Crown royalties.

Crown Minerals (Minerals and Coal) Regulations 2007

The Crown Minerals (Minerals and Coal) Regulations 1999 set out the requirements and procedures for explorers and miners to:

- [apply for a permit](#) under the Crown Minerals Act 1991
- make [permit change applications](#)
- make [royalty returns and payments](#)
- [report to the Crown](#) on prospecting and exploration
- [lodge cores and samples](#) with the Crown
- For more information about reporting requirements please view the [Mineral and Coal Digital Data Submission Standards April 2008 \[108 kB PDF\]](#) document.
